VoteLynx™

Timer Display Modules
TDM-100 Small Timer Display Module
TDM-300 Large Timer Display Module

Two models of LED based timer displays show the VoteLynx Up/Down presentation timer minutes & seconds count to presenters and audience in the meeting room. Large red, yellow, and green LED lamps indicate start, stop and wrap-up cues. The timer displays give presenters a visual status of how much time they have to speak during the meeting.

Model TDM-100 with 0.56" high digits is designed for podium or desk mounting and fits into a standard two gang electrical cutout. The TDM-300 with 5.0" high digits is perfect for wall mounting where high visiblity is required.

The timer display modules may be used with any VoteLynx system configuration. One or more timer displays of either configuration may be connected together. For example, one timer display could be located on the podium top surface for a presenter to see while another display could located on the rear of the podium for city council members to see.

TDM-300 Large Timer Display Module

TDM-100 Small Timer Display Module
